The All-New Sandero and Sandero Stepway opt for a more assertive, contemporary style. This third generation keeps the Dacia spirit with useful innovations and clever, easy-to-use equipment.

The All-New Sandero and Sandero Stepway adopt a new CMF-B modular platform from the Alliance, allowing it to contain its weight to combine driving pleasure with reduced emissions and fuel consumption. This new platform enables the company to offer a more efficient range of gasoline engines that comply with the Euro 6D-Full standard.

- SCe 65 (not available on Sandero Stepway): 3-cylinder 1.0L naturally aspirated, coupled to a 5-speed manual transmission.
- TCe 90: 3-cylinder 1.0L turbocharged, coupled to a 6-speed manual or CVT-type automatic transmission.
- ECO-G 100: new 3-cylinder 1.0L turbocharged 1.0L LPG bi-fuel engine coupled to a 6-speed manual transmission.

A mid-range ECO-G engine, the brand's dual-fuel gasoline and LPG offering, will be available on the All-New Dacia Sandero and Sandero Stepway. ECO-G versions will still be offered at the same price as an equivalent gasoline engine.

For an unbeatable price, more than ever Sandero and Sandero Stepway offer access to a new model at the best price/equipment ratio on the market. Orders will be opened in the coming weeks.
